

PROJECT INFORMATION

Conservation of the endangered Danube Clouded Yellow butterfly (*Colias myrmidone*) in Natura 2000 sites of Romania

Danube Clouded Yellow Butterfly
(female)

Background

The habitat of the Danube Clouded Yellow Butterfly is characterised by a small-scale functional and niche diversity. That makes this species the prototype of a butterfly species, which is adapted to a diverse cultural landscape. Any landscape standardisation and homogenisation leads to a significant and rapid decline of their number. In the last 15 years, this butterfly has become extinct in numerous EU member states. To protect its habitat and existence, the EU listed it in the Annexes II and IV of its Habitats Directive. One of the last known habitats of the species is in Romania where, however, their populations are already endangered.

Project details

The project aims to prevent the disappearance of the butterfly in the three Natura 2000 sites located in the counties of Harghita and Cluj in Romania. Together with experts from Romania, Leuphana University of Lüneburg develops a list of protective measures. During the project, the local people of the counties living in and/or from the protected areas are extensively involved. The list shall include measures which protect the species and which, at the same time, are socially acceptable. These measures shall be included in the future management plans of the concerned Natura 2000 sites. Acceptable measures allow for reasonable use of the sites by humans without endangering the existence of this species. Addressing gaps in knowledge about the habitat requirements of the Danube Clouded Yellow Butterfly and informing the public, e.g. with brochures, information boards and a short film, form a significant part of the project.

Germany can benefit from the findings of the project, too, because new insights into habitat requirements can be used to reintroduce the butterfly into Germany.

Updated: July 2021

Target country: Romania

Duration: 06/2017 – 09/2022

Beneficiaries: Nature conservation administrations of the counties Harghita and Cluj

Implementing organisations:

Leuphana University of Lüneburg,
Georg-August-Universität Göttingen

Project number: 89475, 110311

Thematic management:

Federal Agency for Nature
Conservation (BfN)

Mareike Vischer-Leopold

Tel.: +49-220-8491-1544

mareike.vischer-leopold@bfn.de

Project coordination:

AAP Project service unit

Katharina Lenz
